

## Dear Neighbour

We need your help!

We have once again experienced waste rooms where rubbish is not sorted properly and where waste is left on the floor.

Besides the shame of getting into a room where it all flows, it's also expensive, because the waste workers refuse to empty our garbage containers if the room is filled with cardboard boxes, bottles etc.

In that situation, must pay extra for someone to clear up.

It is a waste of money when we have containers for all types of waste and we, through a minimal joint effort, can save money, and have "neat" waste rooms.

## Make the waste workers and neighbors happy 😊

- **Sort** your waste
- **Respect** markings on the containers
- Please note that there is only container for **cardboard in room 23**
- **Fold** cardboard boxes together before they are handed in the containers labeled "**cardboard**"
- Please note that there are bottle containers in both waste rooms
- Place large garbage so it does not block the next one to deliver something

Best regards and on behalf of the board  
Joy
